

VIDAS Pathogen monitoring system: (M/s bioMerieux – VIDAS 2)

- Advanced and rapid detection of pathogens associated with meat, milk and their products.
- Capable to monitor *Salmonella*, *Listeria monocytogenes*, *E.coli* O157:H7, *Staph.* enterotoxin based on ELISA principle (M/s Biomerieux – VIDAS).
- Able to give results within 24 h.

Principle

Application:

- Detection of *Salmonella* spp.
- *E. coli* H7:O157
- *Campylobacter* spp.
- *Staphylococcus aureus* enterotoxin
- *Listeria monocytogenes*

Type of sample:

- Meat and milk and their products

User instruction:

- Collect sample as early as possible
- Always bring representative sample
- Follow sampling procedure
- Maintain cold chain
